

Report 14/8/2025, 8:02:37 pm

Report ID: 73c56fb9-afa6-4174-8068-00c0a948f60c

Summary Details

Here are the detailed connectivity test results for your location. [Learn about the tests we run](#)
Your location information

Test	Result
Your location	Karvir, MH, India found by the web browser
Network egress location (the location where your network connects to your ISP)	Reston, Virginia, United States
 Your distance from the network egress location	8,188 miles (13,175 kilometers)
 Customers in your metropolitan area with better performance	Not a significant number of other customers have better network connectivity.
Time to make a DNS request on your network	168.63.129.16 (3 ms)
 Your distance from and/or time to connect to a DNS recursive resolver	20.42.77.212 (19 ms)
If you use a proxy server, distance from your location and time to connect	Configured for HTTP on client as 165.225.48.12:80 (1 ms)
 Virtual private network (VPN) you use to connect to your organization	No VPN detected

Microsoft 365 Copilot

Test	Result
 Https Connectivity	All HTTP connectivity tests to Microsoft endpoints have passed. 
 Websocket (WSS) enablement	Your network doesn't block the WebSocket (WSS) connections required for Microsoft 365 Copilot.

Test	Result
 Latency	22.00ms

Exchange Online

Test	Result
 Exchange service front door location	Manassas, VA, United States (7 ms).
Best Exchange service front door(s) for your location	Chennai, TN, India Dubai, United Arab Emirates Mumbai, MH, India Pune, India Pune, MH, India
Service front door recorded in the client DNS	outlook.office365.com -> MNZ-efz.ms-acdc.office.cc [52.96.186.162] This DNS lookup is not relevant to performance because an HTTP proxy server has been detected for this URL. The proxy server will perform the DNS lookup instead.

SharePoint Online

Test	Result
 The service front door location	Sterling, VA, United States
Best SharePoint service front door(s) for your location	Chennai, TN, India Hyderabad, TG, India Mumbai, MH, India Nagpur, India Pune, India Pune, MH, India
 Download speed	80.11 MBps
 Buffer bloat	+0 ms

Service front door recorded in the client DNS	evolenthealth.sharepoint.com -> 201666-ipv4v6.farm.dprodmgd108.aa-rt.sharepoint.com [52.104.68.25] This DNS lookup is not relevant to performance because an HTTP proxy server has been detected for this URL. The proxy server will perform the DNS lookup instead.
---	---

Test	Result
	HTTP proxy server has been detected for this URL. The proxy server will perform the DNS lookup instead.

Microsoft Teams

Test	Result
 Media connectivity (audio, video, and application sharing)	No errors
 Packet loss	0.00% (target < 1% during 15 s)
 Latency	1 ms (target < 100 ms)
 Jitter	2 ms (target < 30 ms)

network path
