Incorrect permissions on Windows Search directories Issue not present Search Filter Host process failed Issue not present Windows Search service shut down unexpectedly Issue not present Windows Search service shut down unexpectedly Issue not present Windows Search service not running Issue not present Windows Search service failed Issue not present Search Protocol Host process failed Issue not present Windows Search is not working Issue not present

### Potential issues that were checked

### **Incorrect permissions on Windows Search directories**

Issue not present

When permissions on the Windows Search data directories are set incorrectly, the search service might not be able to access or update the computer's search index. This can result in slow searches or incomplete search results.

#### Search Filter Host process failed

Issue not present

Problems with the Search Filter Host might indicate errors in the Windows Search service, which can cause searches to fail or return incomplete search results.

#### Windows Search service shut down unexpectedly

Issue not present

When the Windows Search service is forcibly shut down while performing maintenance, searches might fail or return incomplete search results.

## Windows Search service shut down unexpectedly

Issue not present

When the Windows Search service is forcibly shut down, searches might fail or return incomplete search results.

### Windows Search service not running

Issue not present

When the Windows Search service is not running, searches might be slower and you might not be able to find all items.

#### Windows Search service failed

Issue not present

Problems with the Windows Search service can cause searches to fail or return incomplete search results.

### **Search Protocol Host process failed**

Issue not present

Problems with the Search Protocol Host might indicate errors in the Windows Search service, which can cause searches to fail or return incomplete search results.

## Windows Search is not working

Issue not present

You can't enter a search or you get incomplete search results.
