

```
function OpenDialog() {  
    var Itemid = 2;  
  
    var htmltag = document.createElement('div');  
  
    htmltag.innerHTML = 'Item Id is ' + Itemid + '';  
  
    var pageUrl = _spPageContextInfo.siteAbsoluteUrl +  
"/SitePages/dialogpage.aspx?id=" + Itemid;  
  
    var options = SP.UI.$create_DialogOptions();  
    options.title = 'My Modal Dialog';  
    options.width = 400;  
    options.height = 400;  
    options.showClose = true;  
    options.html = htmltag;  
    options.url = pageUrl;  
    options.dialogReturnValueCallback =  
Function.createDelegate(null, CloseCallback);  
    SP.UI.ModalDialog.showModalDialog(options);  
}
```

```
function CloseCallback() {  
    console.log('This the function gets triggered when you close  
the Modal Dialog');
```

```
}
```

```
<button type="button" onclick=" OpenDialog()">Open  
Dialog</button>
```
