

# Windows App Certification Kit - Test Results

App name:  
TimeDateCalculator

App publisher:  
Eigil Krogh

App version:  
6.14.37.0

App Architecture:  
x64

Kit Version:  
10.0.22000.194

OS Version:  
Microsoft Windows 11 Pro (10.0.22621.0)

OS Architecture:  
x64

Report time:  
02-07-2022 11:09:13

---

## Overall result: **FAILED**

---

### Deployment and launch tests

**PASSED** Bytecode generation

**FAILED** Platform version launch

- | Error Found: The high OS version validation detected the following errors:
  - | Cannot launch App
  - | Cannot launch App
  - | The app 57158guitarFineTune.TimeDateCalculator\_6.14.37.0\_x64\_my9557tv9enda failed platform version launch test.
- | Impact if not fixed: The app should not use version information to provide functionality that is specific to the OS.
- | How to fix: Please use recommended methods to check for available functionality in the OS. See the link below for more information.

### Package compliance test

**PASSED** Application count

**PASSED** App manifest

**PASSED** Enterprise Features

**PASSED** Resource Packages

**PASSED** Restricted namespace

## Windows security features test

- PASSED Binary analyzer
- PASSED Banned file analyzer
- PASSED Private code signing

## Supported API test

- PASSED Supported APIs

## App manifest resources tests

- PASSED App resources
- PASSED Branding

## Debug configuration test

- PASSED Debug configuration

## File encoding test

- PASSED UTF-8 file encoding

## App Capabilities test

- PASSED Special use capabilities

## Windows Runtime metadata validation

- PASSED ExclusiveTo attribute
- PASSED Type location
- PASSED Type name case-sensitivity
- PASSED Type name correctness
- PASSED General metadata correctness
- PASSED Properties

## Package sanity test

- PASSED Platform appropriate files
- PASSED Supported directory structure check

Resource Usage Test

**PASSED**

WinJS background task
