The blank wizard window instead of the summary window at the end of MDT8456 image deployment

1. Cannot find the wizard.hta file in the target location, and there is only BDD.log file in the folder DeploymentScripts, but no useful info is there. In the Reimaged PC, there are no OSDLOGS and SMSOSD folders.

- I have tried the suggestions at https://social.technet.microsoft.com/Forums/en-US/c330b699-4165-44d0-836f-f089a5b2c8b5/mdt-not-finishing-just-a-blank-wizardhta-screen?forum=mdt, but no one works for me. In my task sequence, all scripts were executed successfully, but the blank wizard window instead of the summary window.
- 3. The Drivers that were downloaded Dell cabs released on September 13, 2022, extracted from the XE PC, and manufactured SSD driver.
