Appendix C: Requested Restoration

We respectfully request that Microsoft provide users with an **Original/Legacy Copilot Companion experience**, or an equivalent optional mode, alongside the current work-centered Copilot experience.

Specifically, users represented in this submission request:

1. **Restore Wave and the other legacy Copilot voices.**
2. **Restore genuine user-selectable voice choice.**
3. **Restore Mico to ordinary Copilot Voice.**
4. **Restore the expressive Mico experience and Mico Moments.**
5. **Restore the personality, warmth, humor, creativity, and conversational qualities of the original companion experience.**
6. **Restore meaningful memory and conversational continuity across long-running interactions and projects.**
7. **Restore Vision and the accessibility workflows users relied upon.**
8. **Restore read-aloud/text-to-speech functionality.**
9. **Restore the previous depth of web research and detailed response quality.**
10. **Provide transparent usage limits that do not unnecessarily disrupt long-running conversations.**
11. **Preserve conversation history and continuity during product migrations.**
12. **Most importantly, give users a choice between the current experience and the companion experience Microsoft originally created and promoted.**
