Analysis Services Tabular Project

Analysis Services Tabular Project

Project name

TabularProject4

Location

C:\Users\sudarsan\source\repos

...

Solution name 

TabularProject4

☐ Place solution and project in the same directory

Framework

.NET Framework 4.7.2

Configure your new project

Analysis Services Tabular Project

Tabular model designer

Select an Analysis Services instance to use while authoring projects.

☐ Integrated workspace

Integrated workspace eliminates the need to provide an explicit AS server instance.

☒ Workspace server

DESKTOP-TJK1UHP\SQLBI

Test Connection

In order to create a new Tabular model, you must select a compatibility level. The compatibility level must be compatible with the Analysis Services server version you want to deploy to.

Compatibility level:

SQL Server 2019 / Azure Analysis Services (1500)

[Click here for more information about compatibility level.](#)
