Cell C44 is to find at least one deposit from this resident (e.g. House B)

Cell C45 is to sum all of the deposits made by this resident on a determined month and year

Cell C46 is to convert deposits on "stars". Resident should have at least 12 stars/year

All of those deposit information comes from file Ingresos_Egresos 2024_Abril_Short and I want to be transferred automatically to avoid any error.

Information on this file is manually captured from Bank Statements.

I left only three months example to reduce file weight.

Thanks.
