1. Using the Microsoft Intune admin center

- 1. Sign in to the Microsoft Intune admin center.
- 2. Select Devices > Windows 365 (under Provisioning) > Device images.
- 3. Select the device image that you want to attach the new disk to.
- 4. Under Storage, select Add new disk.
- 5. In the Add new disk pane, provide the following information:
 - **Disk name:** The name of the new disk.
 - **Disk size:** The size of the new disk in GB.
 - **Disk type:** The type of disk to create. Choose either **SSD** or **HDD**.
- 6. Select Add.
